

vision:

#frommydeepestsoul stands for personal stories, emotional honesty, and music designed to convey joy, hope, and positive energy.

The lyrics stem from personal inspiration and moments from my life so far. My credo is "Life is a playlist," because we all associate many of our experiences with the music we listened to during those unique moments—whether they were times of great joy or moments that deeply moved us.

Modern AI supports the creative process behind my compositions, while the concept, lyrics, arrangements, song ideas, and overall artistic decisions are developed by the artist, merging into a cohesive whole.

artist statement:

Every song originates from a feeling, and that feeling dictates the song's opening and overall style.

The goal is to reach people emotionally, to touch their hearts (and souls), and to offer them courage, confidence, joy, or a moment of lightness. The ballads, in particular, are meant to serve as "balm for the soul."

My soul and funky/dance tracks embody the enjoyment of joyful moments, lightheartedness, motivation, and the expression of positive energy.

The ballads aim to soothe, comfort the soul, and foster inner peace.

Together, these elements form a positive overall concept—my own personal musical universe: #frommydeepestsoul.

musical concept:

There are three main categories.

Soul represents emotional warmth and depth—combined with positive vibes.

Funky stands for zest for life, groove, energy, and exuberance.

Ballads serve as "balm for the soul"—soothing and rooted in personal stories that resonate with the listener.

In the long run, the released singles will be grouped into thematic albums or channels, allowing listeners to choose music that matches their emotional mood.

creative process:

- **Lyrics:** personally written, inspired by personal life experiences
- **Song concept and arrangements:** self-developed
- **Composition:** AI-assisted
- **Artistic selection and final version:** fully curated.

signature song:

Inspired by the universal desire for freedom, happiness, and the discovery of one's "inner light"—of truly being oneself—I have developed a personality and strength through my life's journey and the experiences that came with it; these define my worth and my self-esteem.

The song embodies the project's philosophy: to convey hope, strength, and positive energy to people through music. It is more of a short story or an essay—a musical narrative—inspired by Verse 27 of the *Manual of the Warrior of Light*.

#frommydeepestsoul

branding:

Recurring visual elements create recognizability. Each cover simultaneously tells the story of the respective song and forms part of the overall brand concept.

The three categories—"Soul," "Funky," and "Ballads" (as my personal sound)—are also visually represented.

current project status:

- **Start: 20th of June 2026**
- **15 singles released**
- **Goal: Build a catalog of 20 songs**
- **Subsequently: Reduced release cadence
and a focus on building reach**
- **Initial algorithmic reach on Spotify already established**

A man and a woman are performing in a nightclub. The man, on the left, is wearing a dark suit and a light-colored shirt, holding a microphone. The woman, on the right, is wearing a black leather jacket and pants, also holding a microphone. They are both looking towards the camera. The background is a dimly lit nightclub with a large disco ball hanging from the ceiling. Several people are dancing in the background, and the floor is reflective. The overall atmosphere is vibrant and energetic.
